

Teaching

Study and doctorate

TROPOS actively promotes young researchers in the Bachelor- and Master education at the University as well as during doctoral research projects.

Highly qualified scientists of the institute contribute to teaching activities in cooperation with the Universität Leipzig.

As joint appointments the department heads contribute to the promotion of young scientists at the university.

In 2012 the Leibniz Graduate School on "Aerosol, Clouds and Radiation: Mineral dust" was formed on the subject of characteristics and effects of mineral dust aerosol particles. <http://www.lgs-car.tropos.de/>

Study
